LIA Deliverable 2: Website Prototype

Bacchanalia Restaurant & Pub

Student: Isabela Sierra Chinchilla
Course: Frontend Development | Teacher: Tiago Bortoletto Vaz
Winter 2026 | Vanier College

Section 1 — Sitemap

The sitemap below shows all the pages of the Bacchanalia website and how they connect to each other through navigation. Each page is labeled clearly and connected with lines showing the relationships between sections.

Section 3 — Bootstrap Skeleton Reflection

The following section describes the three additional Bootstrap components integrated into the index.html skeleton, along with the reason each one was chosen for the Bacchanalia website.

Component	Reason
Additional component 1: Badge	Reason: Badges were added to the menu cards to highlight featured dishes with labels like "Popular" and "New", helping visitors quickly identify standout items from the menu.
Additional component 2: Carousel	Reason: A carousel was integrated in the Gallery section to display multiple photos of the restaurant in a clean and interactive way, allowing visitors to browse the ambiance and food without overwhelming the page layout.
Additional component 3: Toast/alert	Reason: A toast notification was added to the Contact section to provide instant visual feedback when a user submits a reservation request, confirming that their message was received.
